SERVICES

STUDY DEVELOPMENT

- Development of study-specific Acquisition Protocols
- Provide Web-based platform for exams' submission
- Development of study-specific Grading Protocols

TRAINING AND CERTIFICATION

- Equipment
- Technicians

IN-STUDY SERVICES

- Grading of ophthalmic exams (retinal fundus images – CFP, FFA, ICGA, FAF, OCT, mfERG and visual fields)
- Eligibility review
- Management and monitoring of exams received and results
- Data backup procedures and disaster recovery plan
- Secure long-term archiving of study materials

RECEIVE AND GRADE EXAMS FROM

IT SYSTEMS

- Secure custom-designed web based tool to transmit exams between Clinical Sites and CORC (<https://studies.corc.pt/>).
- For grading CORC uses licensed software from the equipment suppliers (e.g., Cirrus (Carl Zeiss Meditec), Heidelberg Eye Explorer (Heidelberg Engineering), Topcon (Topcon Corporation), etc).
- CORC has novel in-house developed software to assess microaneurysm turnover in DR (RetmarkerDR®), classify and quantify AMD lesions (RetmarkerAMD) and perform segmentation of the retinal layers on OCT.

AIBILI is **ISO 9001 Certified** (Certificate nº PT04/01266)
